New Game Bird To Be Released In U.S.

One of the world's great game birds, the capercailie is being introduced into the United States on little Outer Island in Lake Superior.

The huge Egyptian bird known as the cock of the woods, has thrived for centuries from the Pyrenees to Siberia but is a stranger to America.

An attempt to introduce it in Michigan years ago failed. Too many birds were released the numbers before it was established was given as the major reason.

The try is the first big test of the U.S. Wildlife Service's new campaign to bring as many new exotic and game fish to this country as possible.

Gardiner, Bump, New York biologist, was assigned to the task. He has been in Europe getting 50 capercaille for shipment.

The capercaille is a large grouse weighing up to 10 pounds. It is a colorful bird, dark brown on the head and a metallic green breast, can stand almost any kind of weather and has been known to live through the severest winter with only a few pine needles for food.

Wildlife investigators surveyed the entire United States for a long time before finally deciding the Oregon and Idaho areas give the best chance for survival.

On Outer Island, the new capercailles will not have to contend with the hunters. If the birds are established there, they will be introduced on other islands and finally on the mainland.

BEST AND HEALTH

(Royal Bank Letter)

The high price paid by so many men for what they get off life cannot be explained by the fact that men are not masochists. Persons who complain of "pressure" of modern life, but neglect ordinary precautions; persons who, through loss of their normal vigor, are unable to compensate for factors that are intellectually immature.

The layman is not sure of his physical perfection, no matter how well he feels. He needs to co-operate with his competent and understanding physician, to listen to his advice and follow it.

But don't delude yourself. Next worth thing to you giving a physician his layman's opinion is to satisfy him in top shape is to satisfy your nagging conscience by doing half heartedly. A superficial incomplete or hurried examination is to fail to qualify you condemned. The failure, itself, is disastrous self-softening.

Likely the doctor will say you need rest and sleep. If you are in your peak condition the chances are one hundred to one that he is right. Most of us do not until we have gone beyond the point of normal fatigue and have been exhausted, our capacity for "pushing our nerve." We borrow against our capital reserves. We put up as collateral such temporary aids as emotional goods, coffee, alcohol and "the demands of life." The only way to get out of the red is by rest.

To many persons, time taken out for rest seems to be an infringement on an investment. Adults like children, can find excuses for not going to bed, regardless of consequence. The man who is determined on managing his mind for the welfare of his mental and physical health will take this situation in hand.

Strangely enough, nine out of ten such men will find that they get more sleep than ever on their average, and diverting the mind to things around him.

Not only time in bed is to be counted as resting. Short periods of relaxation, spans of time, the relaxation period for long fatiguing tasks, total work accomplished when one attempts to carry on in a long stretch. One may relax when walking along the street, by relaxing his mind and diverting his mind to things around him. One man we know seizes the opportunities given him by red traffic lights to settle down in his car, and rest. This is a kind of intelligent treatment of oneself is efficiency: the most inefficient way of handling tiredness and pressure is to take stimulants or drugs.

MISS ELAINE TORRANCE HEADS BETA SIGMA PHI CHAPTER

The Delta chapter of the Beta Sigma Phi (international business girls cultural and social sorority) recently held its first meeting of the fall season at the Carbon Inn. The chapter selected a president who was unable to attend this fall the vice-president, Miss Elaine Torrance, was club president for the year 1949-50.

A.D. Pierson Dies In Lethbridge

Mr. A.D. Pierson of Picture Butte, a former resident of the Carbon district, passed away in a Lethbridge hospital on Saturday, September 3, at the age of 72.

Mr. Pierson was born in Bennington, Idaho and came to McGrath in 1890. He later moved to Picture Butte two years ago. On May 31st of this year he and his wife celebrated their golden wedding anniversary and the great number of guests attending the occasion were in high esteem which they were held in the community and district.

Surviving are his wife, Sarah, of Picture Butte; four sons, Gene, Dave and Jim of Picture Butte, and one of Carbon; three daughters, Mrs. Frank Lehar of Picture Butte, Mrs. Van Doren of Walla Walla, Wash., and Mrs. Dittmer of Nelson; a son-in-law and three grandchildren and 3 great grandchildren.

Funeral services were held Wednesday, September 7, from the L.D.S. Church, Lethbridge. Burial followed in the family plot in Mountain View cemetery.

BUY SEED EASY

Farmers requiring seed wheat for next year are advised by A.M. Wilson, Alberta's field crop specialist, to buy early and buy good. This fall, good quality seed is likely to be less plentiful than for some time because of severe weather, particularly in the west. In addition, the percentage of wheat this year is higher in many districts than for some years. Mr. Wilson states that in most districts there is some high quality grain available, but it is being advised to speak to the owner as soon as possible about purchasing their needs.

There is a good supply of registered seed available in the province this year and, for a small additional cost, farmers are assured of seed possessing a high degree of purity and a strong germinating ability if at all possible farmers should purchase registered seed.

Money can talk. I don't know why: All it says know is "Goodbuy." And we've noticed it takes a lot to make a "good buy."

"What's the cat's name?" "Ben Hur."

"What's the cat's name?"

"Well, we happen to select

such a name for a cat?"

"Well, we called him Ben until he had kittens."

HELLS GATE PAYS OFF

The rich salmon run in the Fraser River this year is already 300,000 fish higher than the cycle year 1945, bringing new wealth to British Columbia and new joy to the Pacific International Salmon Fisheries Commission, reports the FINANCIAL POST.

The salmon run in the river continues to reproduce and die. In 1945 the total answering the homing instinct was 1,685,000. This year's big increase was credited to the commission's fish ladder built in 1945 to help the fish surmount changes in the 1913 slide from railway blasting, the fishway received its major test this year.

UNITED CHURCH WILL HOLD THANKSGIVING SERVICE

The Carbon United Church will hold its Harvest Thanksgiving service at 11 a.m. next Sunday, October 9. The Junior Ladies Aid is in charge of the decoration of the church. All are invited to attend and would appreciate the cooperation of all who contribute fruits, vegetables, grain, etc. for this purpose. The Harvest Thanksgiving service will be used for the world-wide missionary work of the United Church.

Let us express our thankfulness to God for the many blessings we have received.

The per capita consumption of food in the U.S. is about 1600 lbs.

Canadian National Exhibition Winners

BELALAW AUGUSTA 5th, first prize senior yearling and grand champion Shorthorn female at the C.N.E. in Toronto, is owned by P. F. Law, Weston, Ontario.

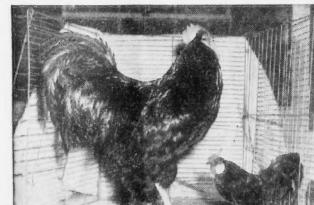

GLENDAIRY WEI MARGIE, grand champion Ayrshire female shown at the C.N.E., by Stansell Brothers, Aylmer, Ontario.

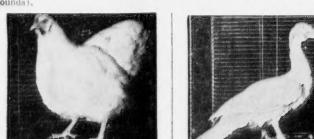

The grand and reserve grand champion Tamworth sows were shown by F. W. Trewin, Nettleton, Ont.

A. O. SCHILLING, internationally known poultry artist with the best male in the C.N.E. poultry show—the champion White Rock cock—shown by Innis and Son, Simcoe, Ont.

The healthy entries at the C.N.E. made a good showing. The black Langshan cock, at left, was reserve champion for C. A. R. Till, Dorval, Ont. (weight about 11 pounds), poses with the champion Rose Comb Black Bantam cockerel, owned by A. and P. Abeira, Toronto (weight about 1½ pounds).

The best pullet and the best female in the Canadian National Exhibition poultry show—the White Wyandotte, owned by P. Veale, Woodroffe, Ont.

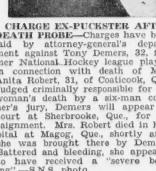

YOUNGEST EVER (S.N.S. photo) to be the youngest person ever to hold such a position in any U.S. college or university, Miss Phoebe G. Follmer, 26, is the new dean of women at Dickinson College, Carlisle, Pa. Miss Follmer graduated from Colgate and Bucknell universities.

DRIVER TRIED TO AVOID ACCIDENT, BUT SCHOOLBOY KILLED (S.N.S. photo) — Although he was traffic-savvy, Gerald Wayne Baker, of Cornwall, Ont., was killed by a transport while journeying to school. The young boy had been given a ride to school by Gerald Daniels, dairy driver, who let him out at edge of road across from school. Daniels had to cross. Lad waited for one truck to pass but walked out in front of following transport. Driver attempted to avoid hitting lad by turning his vehicle upside down in ditch, as shown, but it was of no avail.—S.N.S. photo.

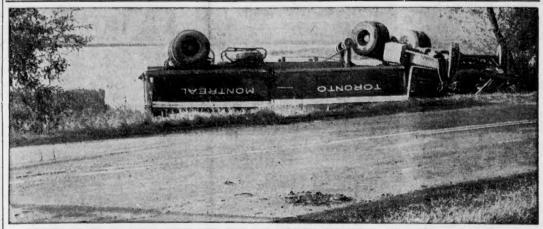

CHARGES IN FUCHESTER AFTER DEATH PROBE—Charges have been laid by attorney-general's department against former National Hockey League player, in connection with death of Mrs. Daniel F. Daniels, 52, of Fuchester. Judged criminally responsible for the woman's death by a six-man coroner's jury, Daniels, 21, in appearance, was arraigned at Sherbrooke, Que., for arraignment. Mrs. Daniels, in appearance, was in poor condition when she appeared at the court, having been brought there by DeMers, Daniels' lawyer. She appeared to have received a severe beating.—S.N.S. photo.

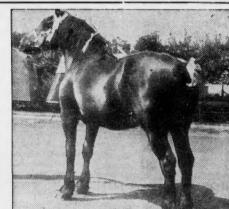

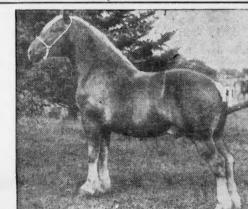

CHAMPIONS—Left: After winning several junior championships for Gilbert E. Arnold, Grenville, P.Q., this young Belgian stallion, Kemptville A. S. Jay Farcur, took senior and grand championship at the Canadian National Exhibition. Right: Champion Percheron mare was Colleen Laet, shown by J. A. Picken, Durham, Ont.

SEPTEMBER STRAWBERRIES—Left: W. O. Creighton, "Strawberry King" of Pictou County, N.S., and, (centre), September berries ready for shipment. Right: Clean cultivation and absence of runners is the key to good strawberry plant production. Inset: A heavily-loaded plant.

GESE AND MORE GESE—Two geese girls at the Hutterite Colony of the Brethren at Washington, Ont., have 5,000 geese. The Hutterites are a community of people who live in a simple way and are called the "Plain People." They raise geese to them. There are nine different varieties in the flock which sell at top market prices and are an important project on this 900-acre community farm where crop yields are beyond anything in the district.

Na

Young Farmers Improving Farm Homes By Loans

OTTAWA. — A big change in the trend of Canadian building was reported by the Finance Department in reviewing loans made by chartered banks under the Farm Improvement Act.

A total of 27 per cent. of \$6,000,000 advanced in August, the heaviest month for loans, was given to young men between 20 and 30 years of age for repairs and alterations to farm houses and buildings, with the emphasis on a considerable movement toward installation of water and plumbing in farm homes along with insulation, refrigeration, household appliances such as stoves, heating and lighting systems.

This shows a trend not existing in winter months, the report said. The older generation was content to carry on but the young farmer has taken over and is making improvements and is repairing his home.

Chartered banks report that loans show a steady increase including a heavy demand for the erection of combines particularly in Western Canada. Advances for repairs to existing farm houses are three times as great as for new houses.

The big increase in loans in Eastern Canada is attributed to the extension of the service to rural communities. Ontario Hydro estimates that electricity will be brought to more than 45,000 farmers in Ontario this year.

Loans to Eastern Canadian farmers are proportionately greater than to those in the West, but are made for the purchase of farm implements, electrical household appliances, farm machinery, farm equipment and construction of farm houses and buildings, fencing, drainage including tile draining, clearing and breaking new land and resevervation.

Finance Department estimates that \$40,000,000 will be advanced to farmers this year under the Farm Improvement Loan Act. Money can be borrowed up to 10 years at an interest rate of five per cent. The maximum loan is for \$3,000.

Indication Shows Grasshoppers To Be Bad For 1950

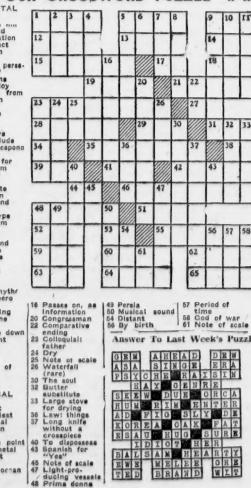

SASKATOON. — A survey of adult grasshoppers during July and August indicated that Saskatchewan farmers would be faced with a bad grasshopper menace in 1950 as they did this year, H. W. Moore, co-ordinator for grasshopper control in Western Canada, said.

The general situation in the province would not change much this year, he said.

A survey of adult grasshoppers conducted by men from the federal entomological laboratory and an estimate based on eggs normally laid, indicated that the grasshopper situation could be expected to be slightly less in the west-central area and increasing.

The other area infested this year, including Saskatoon, could expect the 1949 situation to be duplicated again next year. However, there is a possibility that the infestation might not spread so far north as it did this year, he said.

Claimed The Spotlight

At the Chillicothe, Ia., Fair, Clifton Koeke from Everson, Wash., claimed the spotlight with his attractive six-horse team of grey and black Clydesdales, above, two of which were owned by Sid Jones of Chillicothe. Below, left: Independence District Du Frostie, grand champion Belgian stallion on Chillicothe for Elliott and Verduin, Lynden, Wash. Centre: The grand champion Clydesdale mare and right: The grand champion Clydesdale, Mahogany, Chillicothe, shown by Mahan, Clive, Alta. Far left: Elliott of Chillicothe, in this Little Pacific National Exhibit, represented a large number of horses that a new barn to accommodate 60 race horses had to be built.

Here's How Housing Plan Works For The Home Builder

OTTAWA. — Financing arrangements under the Government's new housing plan would work out this way for the individual:

1. He could get a house for as little as \$600 cash, or as much as \$1,400.

2. For his down payment, he would get a house selling at \$6,000. For his \$1,400 cash down payment, he would get a \$12,000 house.

3. All financing arrangements were based on Central Mortgage's appraisal of a "fair and reasonable price."

When, in the estimation of Central Mortgage experts, the price was not "fair and reasonable," the price would be paid by the buyer.

The builder would still get his basic loan. There was no attempt being made to "fix" the price.

The case of a person building his own home on a lot he had purchased would be worked out in the same way, the contractor he was buying from a contractor.

The lot value would be added to the value of his house, making a total value of the house and the value of the proposition.

With a \$700 lot and a \$2,000 house, the buyer's loan would be \$3,000.

The homeowner's loan would be made on the same basis as if he were buying from a builder.

Maximum total loan from Central Mortgaging and Housing under the scheme was \$9,016.

The builder would get his builder's loan and the homeowner's loan would be advanced on a \$12,000 home.

A homeowner could by a more expensive home, but a more expensive home would be paid for by putting up the balance himself.

work out his own down payment on this basis:

The Government legislation was contemplating a payment of one-half the value of the house by the homeowner.

Then on a \$7,000 home, the down payment would be \$1,000.

All financing arrangements were based on Central Mortgage's appraisal of a "fair and reasonable price."

When, in the estimation of Central Mortgage experts, the price was not "fair and reasonable," the price would be paid by the buyer.

The case of a person building his own home on a lot he had purchased would be worked out in the same way, the contractor he was buying from a contractor.

The lot value would be added to the value of his house, making a total value of the house and the value of the proposition.

A homeowner could by a more expensive home, but a more expensive home would be paid for by putting up the balance himself.

Westerners Win Lifesaving Medals

TORONTO. — Two western residents are to receive Royal Canadian medals for saving drowning brooks and medal for lifesaving.

Dale E. Sparling of Alpine, Sask., won the award for rescuing two drowning from a truck which went through river ice near Flin Flon, Man., last Jan. 5.

The other, a woman, Mrs. Beatrice M. Molyard of Lulu Island, Vancouver, plunged into the Fraser river to save two-year-old Clifford Guillot.

They should worry.

Canadians have developed a nylon fur said to be superior to the real stuff. Oh, well, the seals can always get John Wayne.

OUR COMPLETE SHORT STORY

"BINGO" It Was Bingo for More Than Abby and Rachel Stubbs.

By Louis Arthur Cunningham

ROCKY FEEL, alias Phelan, alias Firm, turned out to be a real cowboy in the sign that said "Rocky—Our night Cains—Home Cooking". This out-of-the-way tourist camp, deep in Carbon, Alberta, is a lonely place, but a natural for Rocky, wanted in a dozen states, with \$5,000 for the one who would bring him in. He was a fugitive, he owned it, he would never squawk. They were probably still looking for him when he was in Illinois plates, too.

This number, for instance, came from a man who said he was the one who owned it, he would never squawk. A guy was a sucker on a lonely road to make a living a life.

"You're a pal, man," said Rocky. He stuck a gun in the old boy's face.

"Drive down a narrow track and at the end of it is a small quarry with lots of water. Rocky drove the coupe back alone. He had the money and passport. He was still in Carbon, he was still on the "onto" the old bird had said. "No, I don't know anyone around here. Please, brother, if you'll just take the money—"

It was easy for Rocky to forget him and a dozen like him. He was looking forward to some home-coming.

Come Out from Under the Shadow of PAIN

DOLCIN Tablets for prompt relief from ARTHRITIC and RHEUMATIC pain. Try DOLCIN, get a bottle of 100 or 500 tablets from your druggist TODAY and join the thousands of relieved sufferers who by taking DOLCIN have come out from under the shadow of Pain...

Most druggists carry DOLCIN. If yours does not, write direct to

Gull Lake Put On Map By Junior Ball Club Urges Seed Grain Tests

GULL LAKE JUNIOR BASEBALL CLUB

From left to right: Rev. Currie, Garry Stevenson, Jack Lloyd, Bob Heribert, Keith Giese, Jack McLean, John Renfie, art boy, Art Schindler. (Vic Wall is not included in this picture.)

By G. H. SLOUS, W.N.T.

THE town of Gull Lake, Alta., ought to be proud these days. It produced a junior baseball club of district boys between the ages of 15 and 20 with a spirit to win that topped the Saskatchewan Provincial Championship. Their boys had played together with such a courageous spirit of winning and won over such odds that was not even considered possible for a small town.

The Gull Lake Junior baseball club made September 11 a "red letter" day in the history of the town. For the first time in the history of the club, a small town whipped the smooth playing Saskatoon Saints, the northern champions, in the Provincial Championship.

Their boys had won the Provincial title, the Gull Lake club had won the northern title, and the Gull Lake boys had won the Provincial title.

Their boys had won the Gull Lake title, the Gull Lake boys had won the northern title, and the Gull Lake boys had won the Provincial title.

WINNIPEG—Seed tests for crops grown in 1899 on the prairies were urged by Dr. F. J. Greaney, director of Northwest Line Elevators farm service.

He pointed out that the most careful cultivation even of the best land will not produce a good crop from poor seed. Seed is the most important single factor in grain crop production, Dr. Greaney said.

Seed tests will be used for five main qualities: germination, seed purity, seed of good variety, seed of good seedling quality and seed of good seedling vigor.

Conditions this year—drought, seed growth, half acre frost—affected the supply of high quality seed grain, Dr. Greaney said, which means less to the farmer through lower yields and grades or because he has to pay more.

Official government tests of seed samples can be obtained from the plant protection division of the agricultural department, 1000 10th Street, Saskatoon or Calgary. These results, he said, are the only ones which can be legally used in advertising seed grain.

RAT EVIDENCE

EDMONTON—An oil worker Angus MacLeod added further evidence to the theory that Alberta is being invaded by rats.

MacLeod, a member of the Alberta Athlete's Association, which has had a very successful year, said he had found a rat in his house.

LITTLE ITEMS OF LOCAL INTEREST

We are sorry to hear that Mrs. S. J. Garrett is very ill in hospital and we wish her a speedy recovery.

Mr. and Mrs. R. Sherring have taken up residence in town, where Mrs. Sherring is teaching at the Carbon school.

Mrs. Munroe has moved into the house formerly owned by Mike Kapunek.

Mr. Ed Boucque left Sunday for Carbon where he will join Mr. Len Dawson, Mr. Francis Poxon and Mr. Jim Flaws for a goose hunting trip in the Acadia Valley area. He was accompanied by a son of Drumheller, who will visit for several days at the home of the former's mother, Mrs. W. Poxon. — The Didsbury Pioneer.

— Watch for the Rummage Sale.

The Anglican Young People's Association recently organized for the winter months and heartily welcomes any new member who wishes to join.

Mrs. L. Goldhamer has returned to her home at Carbon after spending the past five months in the Drumheller hospital.

Born to Mr. and Mrs. Jack Adams on Monday, October 3, a son.

Born to Mr. and Mrs. Pat Ginder on Sunday, October 2, a daughter.

Mr. Ross Thoburn left recently to spend the winter in Eastern Canada.

Attempts to break the recent dry spell in southern England by seeding clouds with dry ice failed.

Dividend Cheques Distributed by Pioneer Grain Co.

Payment of its eighth consecutive cash patronage dividend on grain delivered to its country elevators is being made by local Pioneer Grain agents.

The company started a policy of paying patronage dividends to all its customers in 1941. Immediately after the Dominion Government amended income tax regulations to permit country elevator committees to make these payments, and have made annual patronage dividend payments in cash ever since," said William M. McG. Ratt, President of the Didsbury branch of the Pioneer Grain Company. He stated "It is the intention of the Company to pay a patronage dividend on 1949-50 deliveries to Pioneer elevators. If it can be done, the company will continue this policy of paying patronage dividends was put into effect, we have paid a total of nine cents a bushel on wheat, and seven cents a bushel on other grains; and in distributing to our country elevators a fortuitous payment of sixteen and one-half cents a bushel on barley and thirteen and one-half cents a bushel on oats caused the 1949-50 crop to enter the market at a price below the removal of price ceilings. We made the first of these payments made by any country elevator organization."

BEWARE THE WIND

A dangerous condition exists in Alberta this fall according to the Lethbridge experimental station. Farmers who cultivate fields that contain very little moisture and are liable to drift badly should this fall be windy and dry. Farm operators are advised to "watch out" there are more than 100 fields in the Lethbridge area liable to drift badly. This station advises that using at right angles to the prevailing winds is the only safe method for sowing on clay soils. This may be done by using a three or four cultivator with three or four till shovels or a one-way disc converted into a lister by leaving only every fourth disc.

SEEDTIME and HARVEST
By H. J. MATHER
Assistant to Director,
Lethbridge Experimental Station Service,
Winnipeg, Manitoba.

Fall Cultivation Important

Moisture, as so many farmers experienced this year, is the most important limiting factor in successful crop production in the Prairie provinces. If fall cultivation is properly carried out this fall, will destroy weeds and thereby conserve moisture for the spring crop.

Annual Weeds. Our most troublesome annual weeds are Wild Mustard, Wild Oats, Pigweed, Ragweed and Henbit. Shallow fall cultivation immediately after harvest will encourage many annual weed seeds to germinate. If the soil is left until spring, the seedlings will be killed by frost. Fall cultivation has been particularly effective in controlling Russian Thistle.

Biennials and Winter Annuals. Stinkweed is a typical example. The seeds of this annual germinate in the fall. Unfortunately, the young plants survive the winter frost and, if not destroyed, will re-plant to grow early in the spring. Fall cultivation is therefore an effective means of controlling Stinkweed.

Perennial Weeds. Many attempts to eradicate perennial weeds (Canadian Thistle, etc.) have been made by summerfallowing fall cultivation. Unfortunately, the young plants survive the winter frost and, if not destroyed, will re-plant to grow early in the spring.

Fall cultivation is therefore an effective means of controlling Stinkweed.

Cultivate Early. Fall cultivation should be done as soon as the crop is harvested. Do not cultivate too deeply, as this will not only destroy weeds but will be less wasteful of soil moisture. It will also help to protect the soil from the winter wind which will serve to move the winter's snow. The main object of fall cultivation is to conserve all of the autumn's rainfall for the next year's crop. Kill weeds and save moisture.

Asking a woman her age is like buying a second-hand car. You know the speedometer turned back but you never find out how far.

During the 1948-49 crop year Canada exported wheat flour to 85 different countries or territories.

Skinny men, women gain 5, 10, 15 lbs.
